## Senior UI/UX Designer

PowerCloud Systems delivers cloud-based software that OEMs integrate with their business networking products. The CloudCommand™ online platform makes networking equipment and resources dramatically easier to deploy, configure, secure and manage -- all at a very low cost. Based in Palo Alto, PowerCloud Systems is a spin-out from PARC that is funded by PARC, Walden Venture Capital and Javelin Venture Partners. This is a unique opportunity to join a brilliant, fast growing and well-funded start-up, while leveraging the research and innovation exposure of PARC.

We are actively seeking an experienced and self-motivated User Experience and Design superstar. You must be creative, have a proven track record of developing user interfaces and digital designs for web applications.

The Senior UX Designer will be responsible for leading and executing design efforts in a hybrid role, which requires HTML, CSS and JavaScript coding capabilities and senior-level design experience.

This position reports to the VP, Product Development and Technology and works closely with the Product Development team to support the core product user interface development and with the Marketing team to support outbound web design and creative development needs. Work is organized across multi-disciplinary teams where designers and developers tightly collaborate.

**Requirements:**

- 5+ years of proven track record working in a UI/UX design-focused role for Web properties.
- 3+ years of experienced in identity and brand development.
- Hands on skills in HTML, CSS and Javascript coding
- Hands on skills in standard Adobe design tools
- Impressive creative portfolio focused on digital media.
- Passion for simple design and uncompromising attention for details
- Must be comfortable working on multiple projects across different domains simultaneously.
- React well and quickly to frequent project demands and requirement changes, be flexible to juggle among multiple projects and requests as needed.
- Self-starter and team player, with strong technical and personal leadership skills.
- Excellent analytical, troubleshooting and problem solving skills.
- Strong written and communication skills and enjoy working in a start-up environment.
- BS/MS in Digital Media or equivalent.

**Desired Skills:**

- Experience with JavaScript libraries, HTML 5, PHP, PERL
